

Our Lab

HEALTIS is an MRI Safety and Compatibility **TESTING LABORATORY**. HEALTIS specializes in testing the interactions between medical device and the electromagnetic environment of MRI. HEALTIS has worked with medical device manufacturers around the world, serving to characterize the risks associated with their devices when present in the MRI environment.

The interactions between MRI and medical devices in the examination room are of all kinds: attraction due to the magnetic field, vibrations, heating due to radiofrequencies, electronic malfunction, etc. Our tests allow us to measure these interactions, with tools and methods described by various normative standards, or designed specifically for the needs of the project.

We may be dealing with devices that are already commercially available or devices that are still in development. In the latter case, we accompany the R & D team designing the product in order for it to be optimized for MRI.

Additionally, we offer digital modeling services, technical and regulatory support and training on the MRI safety of MDs.

Medical devices from all over the world come to us to be tested in Nancy, France. We are the sole device testing laboratory in France, and we are among a shortlist of providers around the world.

The number of MRIs and of implants is increasing. Evaluation of the interactions between MDs and MRI is becoming mandatory for our customers, and our activity is growing!

Our MRI tests meet a demanding international normative and regulatory framework. We participate in the normative groups of our field.

Our laboratory is accredited by COFRAC, according to the ISO / IEC 17025 standard for its testing activities (accreditation N ° 1-6320, scope available on www.cofrac.fr)

Job Description

	MRI TEST ENGINEER (M/F)
Role and Responsibilities	<ul style="list-style-type: none"> You will participate in the R & D activity of the Company: in particular, test design and development; development of new methods and new equipment, improvement of existing methods and equipment; You will participate in the realization of customer orders: you will accompany the customers in their project, and for the services with high technicality: you will realize the tests in the MRI environment and will write the reports (in English); You will seek continuous improvement in our organization; You will be required to participate in the normative groups and workshops dedicated to "MRI safety" (international)
Location	Vandœuvre-lès-Nancy, France
Contract	Full Time
Work Hours	Mainly day schedules, occasional staggered hours for MRI tests
Start Date	September 2019
Remuneration	Based on profile and experience
Travel	Some travel required. Occasional trips abroad.

Your profile

Education	Master's Degree, minimum	
Technical Competencies	<u>Essential :</u> <ul style="list-style-type: none"> ■ Physics of EM waves ■ Data processing languages (Matlab, LabView, C, Java) 	<u>Appreciated</u> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> Radiofrequencies <input checked="" type="checkbox"/> Metrology and ISO 17025 reference <input checked="" type="checkbox"/> Knowledge of statistics <input checked="" type="checkbox"/> MRI <input checked="" type="checkbox"/> Signal processing <input checked="" type="checkbox"/> Technical requirements of ISO17025
Language	English and French (oral and written)	
Professional Experience	<ul style="list-style-type: none"> <input checked="" type="checkbox"/> 3 years professional experience <input checked="" type="checkbox"/> Beginner (M/F) accepted 	
Other requirement(s)	Valid drivers permit	

Among the reasons to join HEALTIS....

Take part in the progress of the medical field!

- You will have the opportunity to contribute to the design of medical devices that will shape the world of tomorrow
- Do you have a curious and inventive mind? Your skills and ideas will advance our R & D!

Join a stimulating work environment!

- A multicultural team: you will flourish among employees of different nationalities, young and passionate about their job.
- A structure on a human scale: with us, you will be able to make change and benefit from an important autonomy.
- Our laboratory is located in the heart of the Nancy Brabois CHRU, in the immediate vicinity of our main scientific partners on the subject of "MRI Safety": the IADI and CIC-IT.
- The Greater East Region: an innovative and green region where life is good!

You will find opportunities for development and evolution!

- We will allow you to become a true technical expert in the field of MD MRI security
- By demonstrating your excellence and involvement, you will have the opportunity to build skills and take on new responsibilities, in the technical field or in cross-curricular competencies

To Apply

Please send your letter of motivation and resume to info@healtis.com. Please specify your salary requirements and your availability.
